1. The Examiner finds that Applicant's statement of common ownership overcomes the 103 rejection of the prior Action. At this time, the Examiner makes a new rejection based on the double-patenting statute. This Action is accordingly not made final.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-63 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-83 of U.S. Patent No. 6,939,413 (Crockett) in view of Bates.

Crockett discloses the invention substantially as claimed (see prior Action).

Bates teaches to add potassium silicate and sodium silicate in amounts which result in ratios that overlap those as claimed by Applicant in the same field of endeavor for the

purpose of providing a binder resulting in low residual weld porosity, establishing a prima facie case of obviousness.

It would have been obvious to one having ordinary skill in the art at the time of the invention to add potassium silicate and sodium silicate in amounts which overlap those as claimed by Applicant in order to form welds of low final porosity.
